Skills

Programming Languages: Java
Core Concepts: Object-Oriented Programming (OOP), Data Structures, Problem Solving
Tools: Git, GitHub
Soft Skills: Team Collaboration, Communication, Adaptability

Projects

Java Based Student Management System

Java, OOP *Academic Project*

- Developed a console-based application to manage student records using **Java** and **Object-Oriented Programming** principles.
- Implemented CRUD functionalities for adding, updating, searching, and deleting student information efficiently.
- Applied concepts such as **classes, objects, inheritance, and encapsulation** to build a modular application.
- Improved code maintainability through structured design and reusable methods.

Experience

Fresher

Aspiring Software Developer *2023 – Present*

- Actively learning **Java programming** and strengthening problem-solving skills through academic coursework.
- Worked on academic projects focused on object-oriented application development.
- Collaborated with peers on project assignments and technical presentations.
- Continuously improving coding practices, debugging techniques, and software development fundamentals.

Achievements

- Maintained a strong academic performance with a **CGPA of 8.12**.
- Successfully completed multiple academic projects using **Java** and OOP concepts.
- Actively participated in technical learning and skill development activities.

Education

Government Engineering College, Raichur 2023 – 2027

Bachelor of Engineering — CGPA: 8.12 *Karnataka, India*
